Hi, as a long term resident of clifton beach I do not want to see further expansion of fish farms in Storm Bay. My family fortunately were able to enjoy and be inspired by a storm bay which had not been polluted by fish farms. As a surf coach I have introduced 1000s of young adults to the joy of surfing and providing an experience not tarnished by their visual presence and debris which now so often is found on south arm beaches.
Storm bay is arguably one of the world's best bays and what it already delivers will never be matched by the supposed return of salmon companies.
Yours sincerely
Vincent van de vusse
